

ad
said sulfonic acid, or one or more agents to adjust the viscosity of said composition, or one or more rubber protectorants to protect said rubber, said thermoplastic elastomer, or said plastic wiper blade from oxidation, or one or more neutralizers, or one or more plasticizers or softeners, or combinations thereof.

REMARKS

Applicants have substituted the word "include" for the word "contain" in several places in the claims. This is consistent with the general specification where the composition need only include an acid but often includes multiple other additives to provide other benefits. Applicants have amended claim 13 to be more consistent with the specification page 3, line 36, wherein "1 to 36 carbon atoms" are recited. Applicant has amended claim 13 to specify inorganic acids, organic acids, salts of either or combinations thereof consistent with the specification.

In response to the Restriction Requirement applicants elect Group II, claims 13-20, drawn to a process for cleaning a wiper blade classified in class 134, subclass 27.

Allowance of claims 13-20 is respectfully requested.

Respectfully submitted,

HUDAK & SHUNK CO., L.P.A.
